## PROFESSIONAL SUMMARY

Motivated Full Stack Web Developer with **0–1** year of experience and strong foundational skills in **React.js, HTML5/CSS3, Node.js, Express.js, JavaScript, Java, and Python**. Experienced in building **responsive and scalable web applications**, working with **REST APIs, MongoDB, Firebase, and AWS**. I follow **Agile** practices, write clean code, and collaborate well in team environments.

Comfortable learning new technologies as required, with core strengths suited for **Frontend** and **MERN Stack Developer** roles.

## PROFESSIONAL EXPERIENCE

Junior Software Engineer | Viral Me

Dublin, Ireland (Remote) | June 2023 – April 2024

- Built responsive and interactive user interfaces with a strong focus on scalability, reliability, and high performance across different devices.
- Delivered **clean code, stable UI** in an Agile development environment with maintainable structure.
- Ensured **consistent user experience and reliable UI behaviour** through optimized frontend workflows and version control.

## TECHNICAL SKILLS

- |                                                                                                                                                                                                                       |                                                                                                                                                                                                                                                  |                                                                                                                                                                                                                                                            |

## PROJECT HIGHLIGHTS

**Food delivery app** | [\[Demo\]](#) | [\[Code\]](#) |:

- Developed a **responsive** food delivery application using **React.js** where users can search cuisines, manage cart items, and place orders. Integrated **Firebase** for **authentication** and manual login using email/password. Users can save, update profiles, and view order history. Ensured smooth user experience with **real-time** updates and **intuitive UI**.

**Expense-tracker** | [\[Demo\]](#) | [\[Code\]](#) |:

- Built a user-friendly expense tracker that allows users to set a monthly budget, log expenses, and monitor balance. Implemented **manual login** system and **integrated Gemini AI** via **free API** to assist users with queries. Visualized spending data using **Chart.js** for clear expense insights and improved financial management.

## EDUCATION

• **Full Stack web Development Specialization**

Geekster | Present

• **Bachelor of Engineering (B.E.) – EEE**

SJB Institute of Technology | May 2023

• **Higher Secondary (12th):**

Jalpaiguri Higher Secondary School | April 2019

• **Secondary Education (10th):**

Jalpaiguri Zilla School | February 2017

## CERTIFICATES

- Full Stack Web Development specialization ( [Link to Certificate](#) )
- Python crash course ( [Link to certificate](#) )

## ACHIEVEMENTS:

- Built 30+ Web Projects** using **React, JavaScript, and APIs** (e.g., Quiz App, CRUD Apps).
- Solved **500+** DSA questions on **LeetCode** and **hackerRank**.
- Got 50 Days of problem-solving badge in **LeetCode**.
- Participated in the 75 Days Problem-Solving Challenge**, solving complex **LeetCode** problems.
